

REBECCA PITTS, D.D.S., D.M.D., D.Sc.D.

There is no need to travel to Beverly Hills or New York City to receive the best in cosmetic dentistry. Men and women looking for a dazzling smile have access to one of the profession's highest-credentialed cosmetic dentists right here in Central Florida—Dr. Rebecca Pitts. In fact, many of Dr. Pitts' patients travel from out of state and around the globe to see her.

After receiving her Doctor of Dental Surgery and Doctor of Dental Medicine degrees, Dr. Pitts embarked on an intensive five-year graduate program at Boston University, where she earned the advanced Doctor of Science in Dentistry designation. She also joined an elite group of dentists—currently only 250 worldwide—who have passed rigorous exams and professional requirements to attain accreditation in the American Academy of Cosmetic Dentistry. Moreover, the case studies Dr. Pitts submitted are now used as examples for future candidates. She holds memberships in the International Association for Dental Research, American Association for Dental Research, American Dental Association, Florida Dental Association, and Dental Organization for Conscious Sedation.

Dr. Pitts continually participates in advanced studies in general, cosmetic, restorative and high-tech dentistry in her quest to stay at the forefront of her profession. "I keep up with the latest technology, procedures and materials to make sure that I always provide my patients with the very best dentistry available. Before adding any equipment or technology to the practice, I do extensive research to determine if it would enhance our patients' care and overall dental experience."

In addition to the entire spectrum of cosmetic dentistry, Dr. Pitts offers a full menu of general dentistry services to her family practice. "It takes a high level of skill and attention to detail to perform cosmetic procedures," says Dr. Pitts. "We apply that same standard to all of our general dentistry services. The staff is specially trained and takes particular care to be thorough, yet caring and gentle."

"It is very important to me that our patients feel comfortable and at ease when they come to our office," says Dr. Pitts. Patients are welcomed by name and wait in a comfortable, beautifully decorated reception area. Dr. Pitts understands that many people feel fear and anxiety when contemplating a dental appointment. She offers many safe options, including sedation, to ensure her patients' dental experience is the best it can be.
